

2022-2024 Community Health Implementation Plan Progress

The Community Health Implementation Plan was Approved by the Board of Trustees/Board of Governors on December 28, 2021

GUNDERSEN

HEALTH SYSTEM

2022-2024 Community Health Implementation Plan

In 2010, the Patient Protection and Affordable Care Act (PPACA or the ACA) was passed. As part of this health care reform bill, not-for-profit hospitals are required to complete a Community Needs Assessment and a Community Health Implementation Plan that addresses the identified needs. Evidence of meeting these requirements is to be provided on a hospital's annual tax Form 990, Schedule H. The following document summarizes the regional Community Needs Assessment, and details Gundersen Lutheran's Community Health Implementation Plan for 2022-2024.

The Gundersen Community Health Needs Assessment utilizes the COMPASS Now collaborative assessment that includes 6 counties in our service area, representing 70% of our hospital service patient population, and 42% of the overall population of our 22-county service region. The COMPASS Now assessment has been an ongoing community needs assessment in collaboration with the United Way and other community partners since 1995, with updates every three years.

The 22-county Health Indicator Report concurred with the COMPASS assessment priorities. However, reviewing the broader 22 county region assessment revealed a significant need not identified as a priority within the COMPASS process - obesity and diabetes.

The table below lists the community health needs identified as priorities in the 2021 COMPASS Now report and Gundersen 22-County Health Indicator Report. The prioritized needs align with our Population Health strategic priorities.

COMPASS Now 2021 Priorities

Mental Health

Substance Use

Safe, Affordable Housing
Poverty/Financial Stability

22-County Health Indicator Priorities

Suicide
Poor Mental Health Status
Provider Access

Excessive Alcohol Use
Drug Overdose Death
Opioid abuse and deaths

Housing Insecurity
Financial Insecurity –
Poverty and Alice rates
Food insecurity
Transportation
Adverse Childhood
Experiences

Diabetes
Tobacco
Obesity
Physical Inactivity

Gundersen Population Health Priorities

Mental Health

Substance Abuse (Opioids)

Social Determinants of
Health (including
poverty/financial stability,
housing, food, and
transportation insecurity)
& Adverse Childhood
Experiences and Toxic Stress

Chronic Illness

Our implementation plan, including goals, and action steps, resources, partners and outcome measures, addresses the top priority needs identified for the COMPASS Now 6 county region and the 22-County Health Indicator Report. The priorities are stated directly or embedded as an action step. In addition, the implementation plan supports the Health System's four population health initiatives that serve to strengthen our efforts to improve the health of our communities:

A link to the complete COMPASS Now 2021 assessment, 22-County Service Area Health Indicator Report and other related documents can be found at <https://www.gundersenhealth.org/community-assessment/>.

Approval & Dissemination

The 2021 Gundersen Needs Assessment with the 22 County Health Indicator report and 2022-2024 Implementation Plan were both presented to the Board of Trustees/Board of Governors on November 22, 2021 and approved on December 28, 2021. Progress is underway to implement the plan. The assessment and implementation plan are posted on the website and are available to the public through the Gundersen health libraries.

Identified Need/Issue: Social Determinants of Health

Goal: By 2024, Reduce number of patients reporting having food, housing, or transportation insecurity by 2% (baseline Q4 2022)

Action	Resource (program)	Partnerships	Measure of Impact	2022	2023	2024
Monitor and improve Social Determinants of Health screening and referral for Gundersen Health System patients and families	Quality Population Health 211 findhelp.org Primary Care Social Services Nursing EPIC	Community Based Organizations (CBOs)	95% of patients identifying and wanting assistance for food, housing or transportation will be referred to a community resource	57% of patients identifying and wanting assistance for food, housing or transportation referred to community resource 737 patients received information for community-based organizations for social needs. <ul style="list-style-type: none"> A total of 3,887 programs were shared among the 737 patients. 		
Implement CRC workflow for referrals for patients experiencing stress/toxic stress (initiated with the SDOH survey)	Quality Population Health 211 findhelp.org Primary Care Social Services Nursing EPIC	Community Based Organizations (CBOs)	95% of patients with indicator(s) of stress/toxic stress wanting assistance, receive a referral to a community resource	55% of patients with indicator(s) of stress/toxic stress wanting assistance, received a referral to a community resource. Stress Management Wellness Coaching: 140 Referrals <ul style="list-style-type: none"> 134 Unique patients 55% engaged in “at least some coaching” Among patients with a first and last known stress level: 		

				In general, stress level decreased, and coping skills increased		
<p>Investigate disparities for patient outcomes and develop strategies to address findings</p> <p>Possible disparities to consider:</p> <ul style="list-style-type: none"> - Explore colorectal or breast cancer screening, or tobacco cessation - Street medicine 	<p>Quality Population Health</p> <p>Cancer Center Family Medicine Residency – Street Medicine program</p> <p>Primary Care</p>	<p>As defined by the intervention – CBO’s, municipalities, funders, etc.</p>	<p>Implement at least 1 intervention identified to address findings by 2024</p>	<p>Breast Cancer Screening: Implemented Hmong Women 50+ Health Event</p> <ul style="list-style-type: none"> • May 21, 2022 • Attendees = 15 • Mammogram = 7 • Covid vaccines = 5 • Labs = 1 • FIT = 2 • Displays = 4 (stroke, cancer center, population health, 211) • On-site participating departments = population health, cancer center, admit and registration, financial service, lab, soc serv- interpreters, DEI, breast center, vaccine clinic, nurse advisor • 86% agree/strongly agree = purpose was clear to me • 91% agree/strongly agree = planning process was adequate • 80% agree/strongly agree = communication regarding the plan, needs, and the day was adequate • 100% agree/strongly agree = from your perspective, patients/ community members who attended were satisfied with the event 		

				<ul style="list-style-type: none"> 86% agree/strongly agree = we achieved our goal(s). <p>Street Medicine Team: Provides health care services for population living with homelessness in La Crosse.</p> <ul style="list-style-type: none"> 884 people served

Monitoring Long Term Outcomes

This implementation plan aligns with the Gundersen Health System Community Health Scorecard. The Community Health Scorecard was created to identify key metrics and monitor progress of our organization’s population health strategies which are the foundation of a primary mission, to improve the health of our communities. Common threads connect the community health needs assessment to the scorecard. Embedded within each metric are detailed goals, with many mirroring those of the implementation plan.

Population Health Scorecard Main Cover
